Amendments to the Abstract:

Please amend the Abstract to be one paragraph and read as follows:

The present invention provides a curable composition capable of giving rubbery cured products having excellent adhesion properties ~~against to~~ all-purpose substrates, improved ~~in~~-weather-resistant adhesion properties ~~against to~~ photocatalyst-coated transparent adherends, low ~~in~~-modulus and high ~~in~~-elongation and, further, showing high weather resistance without undergoing surface cracking or discoloration even when used outdoors for a long period of time. The curable composition of the present invention ~~comprises~~ includes a vinyl polymer (I) and an antioxidant (II). ~~the A~~ main chain of ~~which~~ the vinyl polymer (I) is the a product of living radical polymerization, and ~~which the vinyl polymer (I) contains at least one crosslinkable silyl group, and an antioxidant (II).~~
